the **low height** pocket range

The latest ultra **low profile** pocket product available from **Leggett & Platt**.

Our advancements in fine wire technology allow us to manufacture a range of very low profile pocketed innersprings, these products are available in coil heights of 4, 5 and 6 cm.

Exceptional levels of comfort, quality and consistency, the variety of available height options and the ability to create multi-layered units, make this product an extremely versatile and exciting proposition.

Possible uses include:

- Double decker units
- Triple decker units
- Surface layer or combination units
- Mattress toppers

They can also be upholstered to the deckboards of adjustable beds, generating a luxurious feel and enhancing the overall support characteristics of the system.

The **Active Support Technology**® of innersprings allows your muscles to relax in a more natural sleep position. The coils adjust instantly to your sleep movements, comforting and supporting your body actively.
